

PORCELAIN VENEERS

Helping you get
the smile you've
always wanted

Porcelain Veneers And How They Can Transform Your Smile.

Do you want to change your smile?

Are you embarrassed about your smile? Do you find that you never smile in photos or always find a way to cover your smile and teeth when talking? Our custom smile makeovers using porcelain veneers can give you back the confidence and happiness you're missing.

Our custom smile design process and hand-made porcelain veneers are the perfect solution for a longer lasting beautiful new smile. With our unique approach to creating a completely custom 3D digital design, you can try-in your new smile. Our team ensures that your new veneers will look and feel amazing and function like your normal teeth. This makes the process easy, fast and pain free.

No-obligation FREE Initial Consultation

How Can Our Porcelain Veneers Improve Your Smile?

Porcelain veneers custom made by our team using the latest in digital technology and porcelain will give you beautiful looking teeth and allow you to speak, smile and laugh with renewed confidence.

Whether you require single or multiple veneers, we have the perfect solution. Using digital smile design to match your new smile with your facial structure, we are able to 3D print your new smile to try-in before we commit to your final veneers. This allows for complete personalisation and tailoring of your new look to ensure the best possible outcome with no nasty surprises. Our bespoke hand-made porcelain veneers are created using only the highest grade materials in Australia and come with an industry leading 10 year warranty.

Your new set of teeth will be perfectly aligned and have just the right shade to match the rest of your remaining natural teeth if you choose to restore only one arch.

What Are Porcelain Veneers?

Porcelain veneers are thin, tooth-coloured shells or coverings made of porcelain that are placed over the visible parts of your teeth.

These teeth overlays cover the front of each tooth that are applied and look just like natural teeth (but better) and are meant to improve the appearance of your smile.

Dental veneers are customised to match the colour and general shape of your existing teeth so they look just like new and improved versions of your own teeth.

Porcelain Veneers Can Be Used To Improve

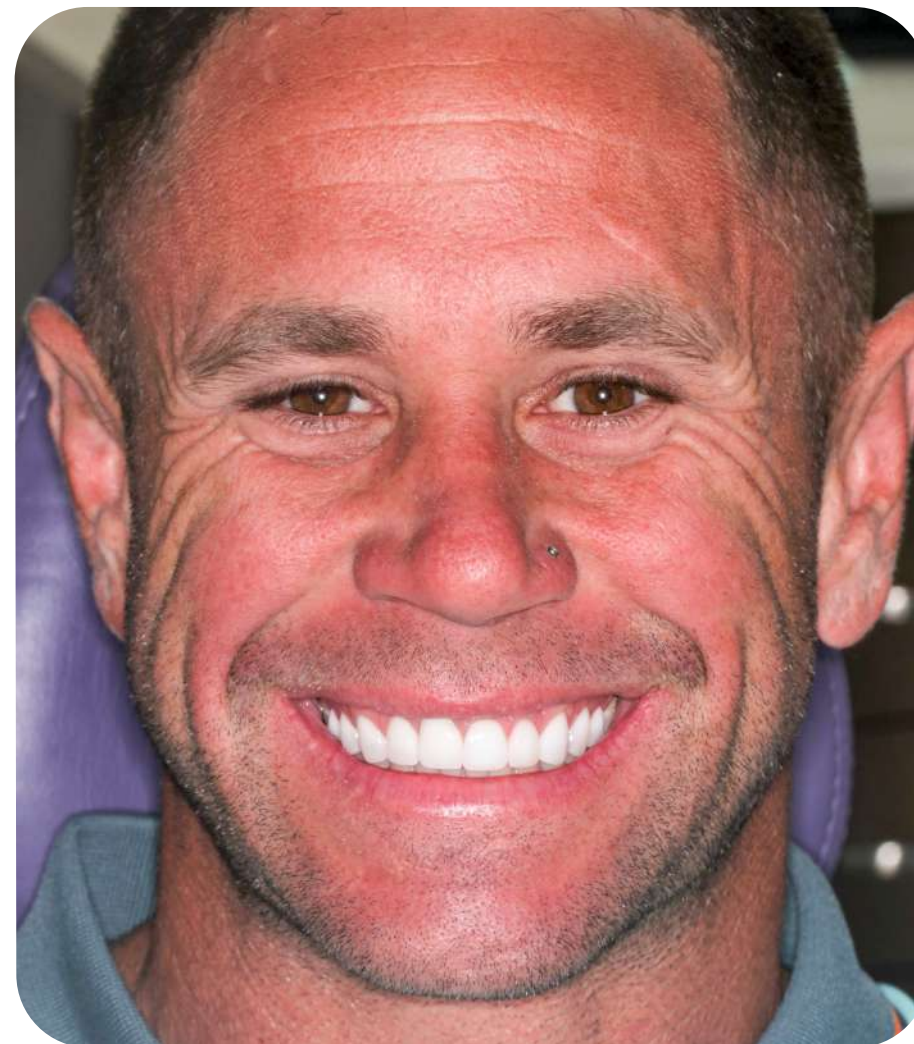

- Worn enamel
- Wear and tear
- Uneven spacing
- Misshapen teeth
- Stained teeth
- Chipped and broken down teeth
- Grey teeth from previous root canal, silver fillings or fluoride stains and tetracycline staining
- Your smile and confidence

Complete Smiles Bella Vista- Leaders in Smile Makeovers

The latest in innovation and dental technology

Our modern techniques and equipment allow our team to produce amazing makeovers time and time again with incredibly natural and predictable results whilst providing a treatment that is minimally invasive, quick and painless to our patients.

Expert level of experience and care in cosmetic dentistry

Our team is constantly learning the latest techniques and procedures to provide the highest standards of care and treatment to our patients. Working only with our Senior Dentist throughout the entire process who has designed and placed over 5000 veneers and is currently tutoring students and graduated dentists.

Sedation for anxious patients

If the idea of dental treatment makes you nervous or anxious, our lovely team will be with you every step of the way and can offer sedation in house for our patients. You won't have to travel anywhere else at any point of the procedure.

The Process Of Veneers And Your Smile Makeover

Consultation – The Beginning Of Your Journey

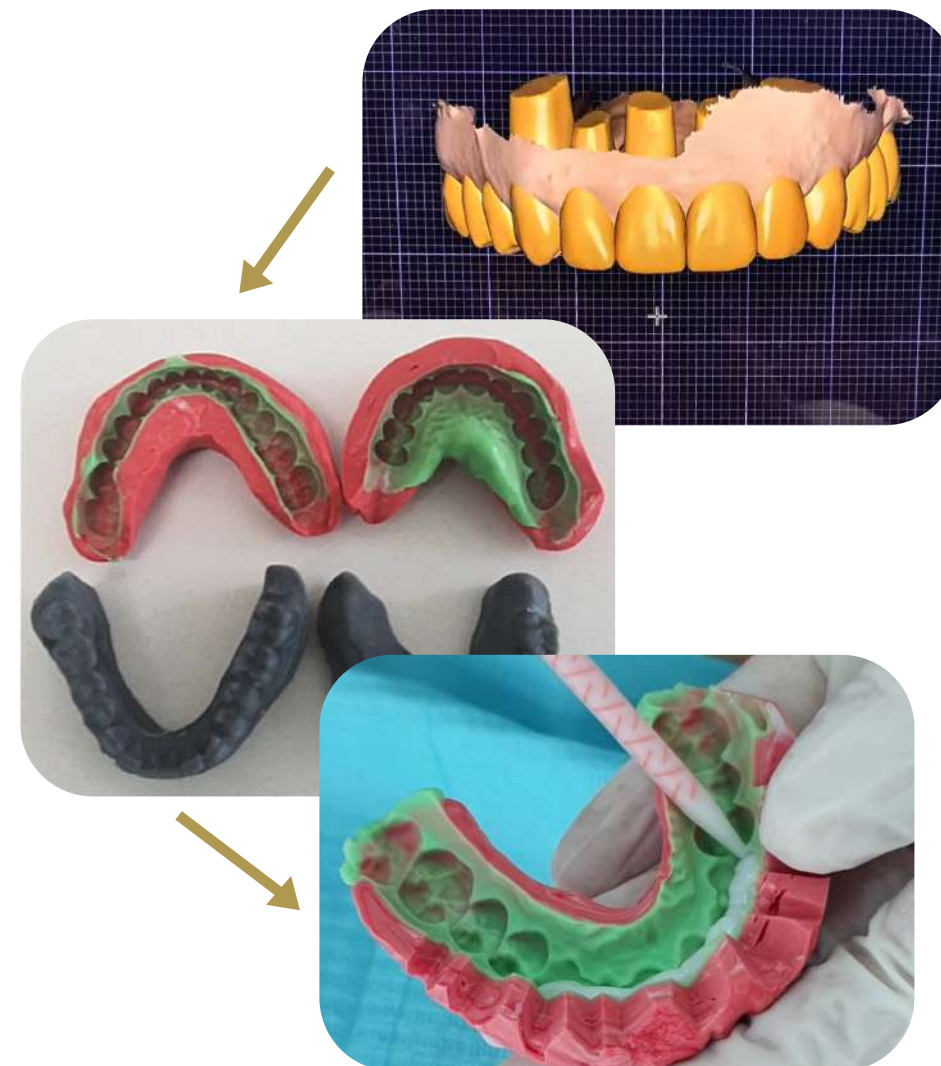

At your first appointment, you will have a one hour consultation to discuss all your concerns and issues. A series of photos and dental x-rays will be taken to allow for accurate planning and diagnosis. We will walk you through your smile design and how the veneers can be shaped to suit your facial features and accentuate them, creating the harmony and symmetry necessary to give you a natural and long lasting smile. At the end of this first consultation, you will be given all the information on what to expect to get your new smile, including the cost.

Trying In Your New Smile - From 3D digital design, to in the mouth

Your next appointment is where you will get to see how amazing your new smile will look. Using the latest in design technology and facial recognition, we will transform your digital smile design into a 3D printed model which we will then use to create a transfer key. A plastic temporary material is inserted into this key which is then placed in your mouth. After only a minute, this material will set and once the key is removed, you will be able to see your new smile.

All of this is pain free and carried out without anesthesia allowing you to smile, laugh and talk to see how your smile will look in every scenario and outing. Unlimited revisions mean any changes that need to be made to the design are then carried out and a final design is then locked in as your new smile. This means our patients know exactly how their new smile will look before the veneers are placed. No hidden surprises.

Preparing The Teeth For Your Porcelain Veneers

At this appointment, your new design has been locked in and now the real journey begins. This appointment will involve either minimal prepping, if any, of the teeth depending on your individual smile requirements and design. At the end of this appointment, your teeth will be covered in what's known as temporary veneers, which are based on your smile design and will be polished and smoothed to ensure a perfect and natural fit. These will be in place while your porcelain veneers are being hand-crafted and are generally held in place for two weeks until the final veneers are inserted.

Your Final Veneers – Now you can smile again with confidence

Your final appointment, where the magic happens. Your final hand-crafted porcelain veneers are ready to be inserted. Here, the temporary veneers are removed and the tooth surface cleaned to allow the veneers to be safely and carefully bonded into place.

We will meticulously place each veneer and ensure your bite and function is correct. Final adjustments and polishing is then carried out before a final clean. You will also be issued with a custom fit night guard to ensure your veneers are always protected.

Now you can smile and enjoy your new found confidence.

How To Look After Your New Smile

Caring for your new smile is much the same as taking care of your own teeth. You will need to maintain regular brushing, flossing, and other standard dental hygiene practices including regular cleanings. You will need to wear your night guard at night to combat any clenching or grinding that could potentially damage the porcelain.

You'll want to be especially careful eating hard, tough, or chewy foods, especially at first and avoiding chewing on pens, crunching on ice, or biting your nails. It is also recommended that you visit our clinic at least once every six months for a general check up and clean and to allow our team to review your veneers and overall gum health.

Pricing will vary depending on individual requirements and the number of veneers required
Various payments options available – including finance and early access to Super release.
